ABSTRACTED-PUB-NO: KR2003009623A

BASIC-ABSTRACT:

NOVELTY - A wet skin-peeling device for garlic is provided which peels skins and squamae of garlic by spraying high pressure water three times and then separating each skin and squamae from the garlic. Therefore, the device can thoroughly peel the skin without damage within a short time such that it can be well suited for large-scale peeling of garlic.

DETAILED DESCRIPTION - The skin-peeling device for garlic comprises:  
a garlic  
introducing apparatus comprising a hopper type garlic vessel(101) and  
a  
conveyor; a skin-peeling vessel for spraying high pressure water from  
the  
bottom and separating a whole bulb of garlic into cloves and peeling  
the skin  
thereof; a skin separator(301, 302) for separating the garlic from  
the skin by  
a mesh conveyor; a drying apparatus comprising a blower(402), a blow  
pipe(403)  
and a conveyor(404) for drying the garlic; a garlic discharge  
apparatus for  
automatically discharging the garlic; and a water circulating  
apparatus  
comprising a water storage tank(601, 602) and a pump(603, 604).
